ABOUT ME

Dedicated Computer Engineering student skilled in full-stack development, database management, machine learning, cyber security and FASTPANEL server deployment. Passionate about building scalable, intelligent system that solve real-world problems.

TECHNICAL SKILLS

Programming Java, Python, JavaScript	Web Development HTML, CSS, React.js	Database Management SQL, MongoDB, Firebase, Supabase
Machine Learning Scikit-learn, TensorFlow, PyTorch, XGBoost	Computer Vision OpenCV, YOLOv8	NLP LangChain
Backend FastAPI, Node.js	Cloud & DevOps Google Cloud, Firebase	Version Control Git, GitHub

PROJECTS

1D – Collision Simulator – Concept of Elastic Collision (Physics)

[GitHub](#)

- *Tech Stack: React, JavaScript.*
- I Build this to understand how elastic collisions work. It shows real-time animation of two objects colling and calculates their speed after impact.

Blood Bank Application – To donate and search for blood.

[GitHub](#)

- *Tech Stack: Java, Firebase Authentication, Firebase Realtime Database, XML, Git, GitHub*
- Build this app so people can easily donate blood or search for it when needed. It keeps track of donor records, blood inventory and requests with a secure login.

Techy Store – E-Commerce website for Electronics

[GitHub](#)

- *Tech Stack: Flutter, Dart, Firebase, Git, GitHub.*
- Made a shopping app for electronics like desktops, keyboards, moitors and accessories. It runs on both Android and iOS since I used Flutter.

MACHINE LEARNING PROJECTS

Diabetes Prediction

[GitHub](#)

- *Tech Stack: Python, Scikit-learn, Pandas, NumPy, Flask, FastAPI, HTML, CSS, JavaScript, Machine Learning, Git, GitHub.*

- Developed a machine learning–based web application to predict diabetes risk using patient health parameters, providing quick and accurate health assessments through an Easy–to–use interface.

CYBER SECURITY PROJECTS

Juice Scanner

[GitHub](#)

- *Tech Stack: Python, Flask, HTML, CSS, JavaScript, Git, GitHub*
- Developed a Python–based web vulnerability scanner that automatically identifies security flaws in OWASP Juice Shop and generates an intuitive web dashboard to display the detected vulnerabilities.

INTERNSHIP and POSITION OF RESPONSIBILITY

Team Lead & Full Stack Developer Intern

MokBuzz Solution Pvt. Ltd. | Feb – Apr 2026 – Present

- Serving as the **Team Lead** for the **BIGISO** SaaS project, coordinating task assignments, tracking progress, and collaborating with team members to ensure timely project delivery.
- Contributing to the development and maintenance of the **BIGISO** SaaS platform by implementing both frontend and backend features.
- Deploying and managing web applications using **FastPanel**, including server setup, domain configuration, SSL installation, and application hosting.
- Collaborating with the development team to integrate new features, fix bugs, and improve application performance.
- Gaining practical exposure to **ISO 27001** concepts, including Information Security Management System (ISMS) documentation and compliance processes.
- Participating in code reviews, testing, and debugging to maintain software quality and reliability.

EDUCATION

- | | |
|--|----------------------------------|
| • Vidyalankar Institute of Technology, Mumbai
Pursuing B.Tech in Computer Engineering | CGPA: 8.5 (Jun 2026 – Present) |
| • Bharati Vidyapeeth Institute of Technology, Kharaghar
Diploma In Computer Technology | 83.83% (2022 – 2024) |
| • HSC (Maharashtra State Board), Mulund
Completed Higher Secondary School Certificate | 46.31% (2013 – 2015) |
| • SSC (Maharashtra State Board)
Completed Secondary School Certificate (SSC) | 70.55% (2013) |

CERTIFICATION

- NPTEL – Programming in JAVA (Jan – Apr 2024)
- C–DAC’s Cloud Computing (Aug 2025)
- BIGISO Internship certificate (Feb – Apr 2026)
